Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant's amendment and accompanying remarks filed 4/23/03 have been entered and carefully considered. Applicant's amendment is found to overcome the previous 102 rejection. Despite this advance, Applicant's amendment is not found to patently distinguish the claims over the prior art and Applicant's arguments are not found persuasive of patentability for reasons set forth herein below.

Claim Rejections - 35 USC § 103

2. Claim 7-9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson (4472461) in view of either Hodgson (3645835), Metcalfe (4559938), Tani et al (4789413), Ward (5000172), Kay (5713842), Plews (5755681), or Takemoto (EP 0353972).

Applicant argues that Johnson fails to teach the adhesive disposed in a "pattern." The cited secondary references are all drawn to the creation of medical tapes and teach the use of a discontinuous pattern of adhesive. It would have been obvious to a person having ordinary skill in the art to utilize the adhesive of Johnson in a discontinuous pattern. Such a modification would have been motivated by the desire to reduce costs by using less adhesive. Perforating nonadhesive areas would also reduce the gas pressure needed to perforate the tape, thereby reducing energy costs and the problem of "floating (cols. 4-5, lines 65-15)." A discontinuous adhesive layer would also increase the breathability of the bandage and increase the comfort to the wearer.

Art Unit: 1771

Applicant argues that the examiner's motivation to use either a hydrophilic or hydrophobic adhesive is hindsight. However, as previously set forth, Johnson teaches the use of an adhesive. Applicant claims the use of either a hydrophilic or hydrophobic adhesive. As stated in the last action, virtually all adhesives can be classified as either hydrophilic or hydrophobic. Therefore, any adhesive used by Johnson would meet applicant's claim. Said rejection is maintained from the last action.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
